PROSTEP ITS

SOLUTIONS
FOR AEROSPACE ENGINEERING

ENGINEERING SUPPLY CHAIN OPTIMIZATION FOR THE AEROSPACE INDUSTRY

The comprehensive range of co-ordinated services that PROSTEP ITS offers allows it to provide customers with made-to-measure, turnkey solutions that support development processes in partner networks.

- Development and optimization of processes, methods and tools for CAD, CAE, Product Lifecycle Management and partner/supplier collaboration and communication.
- Partner integration and method development for digital mock-up processes:
 - Implementation, application and monitoring of methods for PDM/DMU processes and creation of 3D visualizations
 - Data exchange methods, quality control and coordination of partners
 - Methods for production planning and simulation
- Development, roll-out and execution of optimized data exchange processes, based on automation solutions like OpenDXM®.
- Conversion of all major CAD data formats according to specified quality and format requirements.

PROSTEP ITS GmbH, which is part of the PROSTEP Group, provides services tailored to the aviation and aerospace industries. With extensive process know-how, PROSTEP ITS is able to offer customers from these industries top-notch consultancy and development services in the areas CAx, PLM and supplier communication. Companies in the aviation industry can use this comprehensive know-how, in

conjunction with proven methods for target-oriented project management, to exploit potential for improvement and cost reduction in all processes involved in the product development cycle.

SOLUTIONS FOR
AEROSPACE ENGINEERING

GAINING COMPETITIVE ADVANTAGE IN THE
AIRCRAFT SUPPLY CHAIN.
