

# Join PROSTEP and help shape the future of shipbuilding

## PLM Consultant & Product Manager OpenPDM SHIP (m/f/d)

Hamburg

„Our software solutions and IT consulting services make our customers ready for the future“. Join PROSTEP's growing team of more than 280 experts in 12 locations in Germany, Poland and the USA. For more than 25 years our common passion is shaping the digital future for our customers that include big players in shipbuilding, plant construction, and automotive the aerospace industries. Our in-house developed products, vendor-independent solutions and customized strategies, make PROSTEP the leading specialists in the industry. Our motivated and highly skilled team members are always able to find a way even when others have long since thrown in the towel.

### IN THIS YOU CAN SUPPORT US

**As Product Manager** you will establish our latest product OpenPDM SHIP internationally on the market. You will be responsible for development and marketing in close cooperation with the corresponding line organizations at PROSTEP, as well as playing an active role in key sales activities.

**As PLM Consultant** you will maintain close contact with your customers and the qualification and realization of their requirements. You will advise and prepare our customers in the introduction of new PLM systems and design their seamless integration into a digital platform based on PROSTEP's OpenPDM Commercial Off The Shelf Software (COTS).

The task includes the following topics:

- Alignment of the product according to PROSTEP's product strategy and positioning on the international market.
- Development of business plan in the context of market requirements and competition.
- Active support of sales and business development as well as product marketing.
- Active role as PLM consultant at the interface between business and IT in conception, development and implementation of solutions in the digital platform.
- Responsible for the implementation of requirements and the project management in customer projects.
- Management of the entire product life cycle – from conception and planning to development and rollout.
- Release planning and control of product development.

### YOUR SKILLS

It is not crucial that you already master all relevant topics on day one. What counts for us, is that you are motivated and open to learn new skills to help realize the stated position objectives. We want your creativity and your passion for excellence. Please outline your experiences in these key areas;

- Multiple years of professional experience in the maritime PLM environment and good knowledge of processes in shipbuilding and/or shipping.
- Strong (international) communication skills, convincing and sales-oriented experience expressing confidence in complex situations.
- Project management and coordination experience and are familiar with "agile" as well as traditional project management methods.
- Overall familiarity with shipbuilding relevant development methods and manufacturing solutions, e.g. from AVEVA, CADMATIC, Dassault Systèmes or Siemens PLM as well as marketable PDM systems such as ARAS, ENOVIA, SAP PLM or Teamcenter.
- Working knowledge of ERP and MES solutions
- Product Roll-out or Management Experiences
- Team Experiences that highlight your sense of responsibility and initiative.
- Strong written and verbal skills in German and English as well as willingness to travel as required.

### THIS YOU CAN EXPECT FROM US

- We offer you a secure job in a financially stable company with a first-class reputation.
- We rely on a cooperative work atmosphere with short decision-making paths, creative space for your own ideas and individual development opportunities.
- From day one you will be supported in your further development by experienced experts and will quickly assume responsibility.
- With us, you will work in a team of people with outstanding technical know-how, a strong team spirit and a healthy work/life balance.

### AND NOW?

Become part of our team! If you are convinced that the task is suitable for you and you share our vision of customer orientation, cooperation and quality, we look forward to receiving your informative application documents.
